

# PRADEEP KUMAR

Computer Science Engineering Student | Python Developer | AI/ML Enthusiast

Email: pradeepkumar.cse@example.com | GitHub: github.com/pradeeprosy | LinkedIn: linkedin.com/in/your-user

## PROFESSIONAL SUMMARY

Computer Science Engineering student focused on building practical technology solutions with Python, Artificial Intelligence, and modern web frameworks. Active builder with strong foundations in data structures, relational database modeling, and competitive hackathon prototyping.

## EDUCATION

### Bachelor of Engineering (B.E.) - Computer Science and Engineering

Coursework: Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks

## TECHNICAL SKILLS

Programming: Python, Java, C, C++

Web Development: HTML5, CSS3, JavaScript, Flask, FastAPI

Databases: MySQL, SQLite, MongoDB

AI & Machine Learning: Natural Language Processing, Machine Learning, Data Analysis

Developer Tools: Git, GitHub, VS Code, REST APIs

## KEY PROJECTS

### 1. AI-Powered College Chatbot | Python, Streamlit, NLP, Sentence Transformers

- Engineered an NLP conversational assistant indexing college admissions, curricula, and schedules.
- Utilized sentence embeddings and cosine similarity to deliver instant, referenced answers.

### 2. Citizen Safety and Travel Assistance Network | Python, Flask, SQLite, JS

- Developed a centralized web portal providing verified digital identity and emergency SOS broadcasts.
- Built geofence-based alert zones and an administrative situational monitoring dashboard.

### 3. Alcohol Quota Regulation System | Python, Flask, SQLite/MongoDB

- Implemented user age eligibility verification and dynamic monthly quota tracking across outlets.

### 4. Plastic Waste Management System | Python, Flask, SQLite, HTML/CSS

- Created a municipal waste tracking and recycling rewards platform to encourage segregation.

## HACKATHONS & INNOVATION

- Participated in university hackathons engineering civic technology and environmental logistics.
- Presented technical prototypes demonstrating full-stack architecture and machine learning pipelines.
